Directors' report on operations

Results for the first six months

The first half of 2003 was held back by unfavourable conditions in the major international markets and by the strong appreciation of the euro.

Despite these circumstances, De'Longhi achieved revenue growth (at constant exchange rates) of 6.7%. The trend at current exchange rates shows an increase in revenues of 2.1% with respect to the first half of 2002.

The gross profit improved from Euro 288.7 million to Euro 302.6 million, or from 51.7% to 53.0% of sales, thanks to the product mix and the greater use of the Chinese market for production and sourcing.

The increase was offset at the EBITDA level, mainly due to the rise in advertising for new products. EBITDA amounted to Euro 62.6 million (Euro 62.9 million as of June 30, 2002), falling from 11.3% to 11.0% of sales.

The operating profit (EBIT) came to Euro 28.9 million (Euro 29.1 million as of June 30, 2002), falling from 5.2% to 5.1% of sales.

The pre-tax profit, Euro 8.0 million, includes non-recurring expenses of Euro 7.5 million in relation to the tax amnesty settlement.

Note that the first six months usually represent the less profitable half of the year. In 2002, for example, the first half produced revenues amounting to 44% of the total and about 35% of the year's EBITDA.

Investments in tangible fixed assets during the first half of 2003 came to Euro 16.7 million, compared with Euro 15.1 million for the same period in 2002.

The net financial position improved by Euro 93 million, from Euro 398.9 million as of June 30, 2002 to Euro 305.9 million at the close of the period. Contributing to that change was Euro 81.4 million generated by the securitization.

We continued to boost production capacity and the proportion of products made in China, in order to achieve the competitiveness needed to deal with falling prices and the unfavourable exchange rate trends against the euro in all markets.

*Market
conditions*

The first half of 2003 suffered a decline in worldwide GDP.

The less than stellar performance of euro-zone countries in 2002 took a further turn for the worse: Italy, Germany and France were penalized by the appreciation of the common currency, which made exports less competitive. The standstill in private consumption and investments was paralleled in Italy by surging inflation, and in Germany and France by rising budget deficits and unemployment.

GDP during the first six months did grow in the United States (thanks to private consumption and defence spending); in Japan (due to exports and private consumption and investing) and in the United Kingdom (thanks to solid domestic demand).

Because of economic conditions not conducive to home appliance sales, the group's main markets showed stable or slightly declining trends, with the exception of some product categories (chiefly coffee makers) that continued to grow as they have for several years.

Of particular note is the market for portable and wall-mounted air conditioners, which benefited from an exceptionally hot month of June in Italy and the rest of Europe. The De'Longhi Group, the world's leading manufacturer of portable air conditioners, enjoyed a steady rise in sales in keeping with the extraordinary growth of this market. As for wall-mounted conditioners, heavy competition caused average selling prices to fall.

*Interest
and exchange rate
trends*

During the period the euro continued its ascent against the other main currencies. Considering the average exchange rates for the period January-June 2003 with respect to the same period in 2002, the euro gained 23% against the US dollar, 10% against the British pound and 13% against the yen.

In an effort to spur a recovery, the European Central Bank and the US Federal Reserve cut interest rates during the half-year, respectively from 2.75% to 2% (the minimum level since the founding of the ECB) and from 1.25% to 1% (a 45-year low).

The group has hedging policies in place against exchange and interest rate risk. Hedging contracts on the British pound produced exchange gains which offset the loss at the EBITDA level. These were accounted for at net interest expense level.

*Group
performance*

Below is the reclassified income statement, with profits shown gross of taxes.

	2003 First half	% of sales	2002 First half	% of sales

The growth in revenues (+6.7% at constant exchange rates and +2.1% at current rates, compared with the first half of 2002) is the combined effect of an increase in volumes and a more lucrative product mix, versus a widespread reduction in prices caused by stronger competition.

Performance by business line

The performance of the Group's various business lines is summarized in the table below:

DE'LONGHI GROUP	2003 First half	2002 First half	Change 2003-2002	% Change at current exchange rates	% Change at constant exchange rates	31/12/02
Cooking and food preparation	237.0	244.9	(7.9)	(3.2%)	3.9%	557.4

Total	570.7	558.7	12.0	2.1%	6.7%	1,273.7

(*) "Other" includes revenues from the sale of accessories, parts, raw materials, semi-finished products and scrap, as well as service revenues, casual gains and other income.

Cooking and food preparation

This business segment showed a growth rate of 3.9% at constant exchange rates, while the decline in the main currencies against the euro caused revenues to fall by 3.2% at current exchange rates.

Cooking and food preparation products did very well in the domestic market, thanks mainly to the launch of new products like the "Alicia" electric moka (De'Longhi), the "Saladino" electric vegetable cutter (Ariete, launched in late 2002), and the "Mangia-bevi Simac" introduced in 2003. During the half-year sales continued to rise for coffee machines and "Kenwood Chef" food processors, especially in Italy.

Deep fryer sales were down in the UK market, which is suffering from heavy competition.

Air conditioning and air treatment

This business segment enjoyed growth of 14.4% at constant exchange rates (+11.6% at current rates). The second quarter, traditionally the most important for this area of business, was responsible for the positive performance.

A boom in portable air conditioners, made possible by the heat wave in De'Longhi's major markets, allowed solid growth in Italy, the rest of Europe, and even North America despite the negative exchange rate effect. With an expanded yet streamlined range, we were perfectly positioned to take advantage of the favourable weather conditions.

Dehumidifiers also did well, especially in the domestic market with the introduction of the new compact model.

Large thermo-cooling machines enjoyed a similar upturn. Wall-mounted systems saw a rise in sales by volume, but suffered from falling prices caused by the increased competitive pressure. Nevertheless, efforts we began in 2002 to lower the production costs of these models compensated for the decrease in selling prices.

Cleaning and ironing systems

The main reason for the decline in revenues in this business segment during the first half of 2003 (-14.9% at current exchange rates) is the reduction in sales of floor cleaning products to OEM customers in the United States. Ironing products performed well, thanks to the launch of the new ironing systems.

Heating

Growth in this business segment (+16.4% at constant exchange rates and +13.2% at current rates) is primarily ascribable to the boom in water-filled radiators, thanks to new commercial agreements in effect in the United Kingdom.

As far as Kenwood is concerned, during the first half we made the distribution and commercial arrangements for the Europe-wide launch of the new "Kitchen Machine Titanium" and for the introduction in continental Europe of the "Smoothie", a blender with its own dispenser spout for the preparation of cocktails and shakes of all kinds.

Growth by geographical area

The group's sales trend is broken down below by geographical area:

DE'LONGHI GROUP	2003 First half	2002 First half	Change 2003-2002	% Change at current exchange rates	% Change at constant exchange rates	31/12/02
Italy	190.9	165.9	25.0	15.0%	15.0%	350.9
United Kingdom	70.8	75.6	(4.8)	(6.3%)	2.7%	188.3
Rest of Europe	166.6	153.3	13.3	8.6%	9.3%	343.4
USA, Canada, Mexico	54.6	74.2	(19.6)	(26.4%)	(10.9%)	165.0
Japan	14.0	18.6	(4.6)	(24.8%)	(15.9%)	69.0
Rest of the world	73.8	71.1	2.7	3.9%	9.8%	157.1
Total	570.7	558.7	12.0	2.1%	6.7%	1,273.7

During the half-year De'Longhi confirmed its excellent performance in Italy (+15.0%), due to a successful season for portable air conditioners, the newly released cooking and food preparation products (most notably "Alicia"), and large thermo-cooling machines.

The UK market also grew, with sales growth of +2.7% at constant exchange rates (-6.3% after accounting for the exchange rate trend). Healthy sales of water-filled radiators and some other categories of product helped compensate for the problems in the fryer market.

Sales in the rest of Europe, at current exchange rates, were up 8.6%. The group continued to do well in France, enjoying brisk sales of air conditioners and water-filled radiators, and in Spain and Portugal thanks to the opening of direct local affiliates.

Sales in North America were down (-10.9% at constant exchange rates), but regained some ground compared with the first quarter thanks to the positive performance of air conditioning. A comparison with the first half of 2002 shows a drop in sales of cleaning products to OEM customers, and ongoing difficulties in the fryer market. Prospects are good for the new agreements with regard to heating products, that will take effect during the second half.

In Japan, where the first half of the year makes a smaller contribution to overall revenues and profitability, sales were down due to the depreciation of the yen against the euro and to reduced business in floor cleaning products and coffee machines. During the second half of the year, we should see a rebound for coffee makers thanks to the launch of some new models.

Results

The gross profit rose from 51.7% of sales as of June 30, 2002 to 53.0% for the first half of 2003, thanks to an improved product mix and the optimization of production and sourcing activities through more extensive business in China.

As for the main components of EBITDA, which totalled Euro 62.6 million with little change on 2002, we report an increase in service costs due to a rise in advertising and logistical expenses. The increase in advertising costs supported product launches, mostly in the Italian market, while the rise in logistical costs was caused by a number of one-off events: the transfer of some production lines to China and the prudent stocking of goods; the higher stocks of air conditioning products put up for sale after the end of June; and the transfer of the central European Kenwood warehouse from the Netherlands to Treviso.

Amortization and depreciation, at Euro 33.6 million, include Euro 6.6 million in goodwill amortization and Euro 10.0 million for the amortization of other intangible assets.

EBIT for the half-year was Euro 28.9 million, essentially in line with 1H02. As a percentage of sales it decreased from 5.2% to 5.1%.

Financial expenses were reduced by Euro 3.3 million compared with the first half of 2002, thanks mainly to gains from exchange rate hedging and a decrease in interest expense.

On April 28, the group redeemed the € 150 million bond, which over the first four months of the year produced financial expenses at a rate of 7% due to interest rate hedging arrangements. Therefore, the first half of 2003 drew a partial benefit from the reduced cost of money, since the long-term loans taken out to replace the bond charge interest at rates in line with the market and with a spread of less than 100 bp on the EURIBOR. During the second half of the year, the group will benefit fully from the lower cost of capital.

Of the non-recurring items, the most significant expense was Euro 7.5 million for the tax amnesty settlement in accordance with Legislative Decree 289 of December 27, 2002 (as amended).

The pre-tax profit, net of minority interests, was Euro 8.0 million.

Key balance sheet figures

The group's balance sheet is summarized below:

	30.06.03	31.12.02	Change 30.06.03 31.12.02	30.06.02	Change 30.06.03 30.06.02

Net financial position	(305.9)	(269.1)	(36.8)	(398.9)	93.0

Net working capital (on a rolling basis over 12 months) amounted to 23.6% of sales, versus 29.1% for the first half of the previous year and 21.1% for full-year 2002.

On a comparable basis (excluding the effects of the securitization), net working capital came to 29.9% of sales, a slight increase with respect to 1H02. That trend is explained chiefly by the accumulation of additional stocks, as a prudent measure, due to the transfer of fryer production to China and the strong demand for air conditioners even after the close of the period. Stocks were also built up at the commercial branches of Ariete that were recently established in Spain and Portugal.

Net debt, which fell from Euro 398.9 million as of June 30, 2002 to Euro 305.9 million as of June 30, 2003, improving by Euro 93.0 million, benefited from the cash flow generated by the securitization of trade receivables (Euro 81.4 million). During the half-year, cash was absorbed when the group took over the commercial establishments of some former distributors in New Zealand, Australia and Spain.

The ratio of net debt to shareholders' equity (gearing) dropped from 0.75 at the close of 1H02 to 0.56 as of June 30, 2003 (0.49 as of December 31, 2002).

Cash flow can be summarized as follows:

	30.06.03	31.12.02	30.06.02
Self-financing	42.4	108.4	44.9
Changes in net working capital	(16.4)	22.5	26.6

Human Resources, Organization and Systems

As of June 30, 2003 the De'Longhi Group had 5,870 employees (5,646 at the end of 2002), as follows:

	30.06.03	31.12.02 (*)
Workers	3.819	3.713
White collar	1.954	1.839
Managers	97	94
Total	5.870	5.646

(*) Figures reclassified for the sake of comparison with June 30, 2003.

Payroll costs were up 3.0% on the first half of 2002, due primarily to contractual and merit rises and to the increase in the average workforce.

Capital investments

Investments in tangible fixed assets came to Euro 16.7 million, an increase of Euro 1.6 million compared with 1H02. They mainly referred to moulds and equipment for the creation of new products, and systems and other assets used mostly to enlarge the finished product warehouse in Mignagola (TV), which now houses the European Kenwood warehouse previously located in the Netherlands.

Communications & advertising

During the first half of 2003 the group spent Euro 31.6 million on advertising and communications, an increase of Euro 5.6 million (+22%) on the first six months of 2002. Much of that amount went to the advertising campaign for Alicia, the electric moka, to assure continued popularity after its highly successful launch at Christmas 2002.

In the Italian market, advertising support for the De'Longhi Pinguino was refreshed with a commercial for our premium portable model. Sponsorship by the winning cyclists of the Giro d'Italia race gave the brand excellent visibility throughout the country.

As for Kenwood, efforts were focused on trade marketing, by way of co-marketing sponsorships with the main chefs' associations in Europe and investments in industry publications.

Corporate Governance

During the first half 2003, De'Longhi S.p.A. equipped its Corporate Governance system with additional means of optimizing internal control and helping the Board of Directors identify and manage business risks.

Specifically, at its meeting of March 4, the Board of Directors adopted the new version of the Code of Conduct submitted by the Internal Auditing and Corporate Governance Committee, which incorporates the changes made to the Code in July 2002 by Borsa Italiana S.p.A.'s Committee for the Corporate Governance of Listed Companies.

In addition, the Board of Directors has taken over Management's job of overseeing compliance with Legislative Decree 231/2001, with assistance from the Internal Auditing and Corporate Governance Committee, and asked the managing director to take all necessary steps to produce the "Organizational Model" required by the legislation.

Lastly, as of today's date, the Board of Directors has approved the Code of Ethics and the guidelines for significant transactions and internal dealing.

*Intercompany and
related party
transactions*

The effects of De'Longhi S.p.A.'s and other group companies' transactions with parent companies, non-consolidated subsidiaries, associated companies and related parties are reported in the notes to the financial statements.

*Outlook for the
rest of 2003*

We are moderately optimistic about our economic and financial prospects for the second half of the year, in light of scheduled product launches including two super-automatic coffee machines and a new wall-mounted air conditioner. We are cautioned, however, by the fact that any upturn in the global economy is expected to bypass Italy and other European countries of major importance to our business.

Subsequent events

No significant events have occurred since June 30, 2003.

**FORM AND CONTENT OF THE CONSOLIDATED AND PARENT COMPANY'S
FINANCIAL STATEMENTS AS OF June 30, 2003**

The consolidated financial statements as of June 30, 2003 include the consolidated balance sheet, income statement and these explanatory notes and have been drawn up in accordance with Legislative Decree 127/91 and the Italian Civil Code, as supplemented by the principles upheld by the National Board of Professional Accountants. They take account of the provisions introduced by Legislative Decree 58/1998 (the Draghi Consolidated Act) and subsequent decrees issued for the purpose of implementing and supplementing CONSOB recommendations.

The balance sheet and income statement items from the consolidated and the Parent Company's financial statements have been combined, as permitted by Regulation 11971 approved by CONSOB on May 14, 1999 (as amended), to show in the balance sheet only those items preceded by Roman numerals—with the exception of receivables, payables and provisions for risks and charges which are listed in greater detail—and in the income statement only those items preceded by Arabic numerals, in accordance with Art. 81 par. 4.

All omitted figures, if significant, are presented in these notes, whose purpose is to illustrate and supplement the figures contained in the balance sheet and income statement, and to present the information required by CONSOB Regulation 11971/1999 and all complementary data necessary for fair and truthful disclosure even if not required by specific legislation.

The consolidated and the Parent Company's financial statements are presented gross of taxes, and the latter are shown gross of adjustments and provisions made exclusively for tax purposes, as permitted by Art. 81, par. 7 of the aforementioned CONSOB regulations for the preparation of half-year reports.

In addition, some of the figures reported in the consolidated accounts and notes as of December 31, 2002 and June 30, 2002 have been restated for the sake of comparison with end-June 2003.

The figures shown in the balance sheet, income statement and in the related explanatory notes are expressed in thousands of Euro (EUR/000).

SCOPE OF CONSOLIDATION

The scope of consolidation includes the financial statements of the Parent Company, De'Longhi S.p.A., and of the companies of which, as of June 30, 2003, it directly or indirectly owned the majority of share capital or shares with voting rights.

During the first half of 2003, the scope of consolidation expanded due to:

- the founding of the companies De'Longhi Australia Pty Ltd., De'Longhi New Zealand Ltd. and De'Longhi Electrodomesticos Espana S.L., which market group products locally in place of previous distributors;

EXPLANATORY NOTES TO THE
FINANCIAL STATEMENTS

- the founding of Chat Union Climaveneta Company Ltd., a 50% subsidiary of Climaveneta S.p.A., which manufactures and sells large air conditioning systems in the Chinese market and which is consolidated under the proportional method.

The list of companies consolidated as of June 30, 2003 (on a line-by-line basis, under the proportional method and under the net equity method) is provided in an attachment.

CONSOLIDATION METHODS AND ACCOUNTING POLICIES

The accounting principles and the evaluation criteria used in the half-year report as of June 30, 2003 are the same as those used to prepare the consolidated financial statements as of December 31, 2002, except for the fact that income taxes are not provided for, nor are (in the Parent Company's accounts) adjustments and provisions made exclusively for tax purposes.

Translation of foreign currency financial statements into Euro

The financial statements of foreign subsidiaries are translated into Euro as follows:

- at period-end exchange rates for assets and liabilities;
- at average exchange rates for the half-year for items in the income statement;
- at historical exchange rates for the individual components of shareholders' equity.

The exchange differences arising from this method are booked directly to the "cumulative translation adjustment" under consolidated shareholders' equity.

The following exchange rates were used:

Total	554,394	435,462	537,298	434,616	846

Movements in the main intangible asset items during the first half of 2003 were as follows:

	Start-up expenses	Research and development costs	Industrial patents and intellectual property rights	Concessions, licenses, trademarks and similar rights	Consolidation differences	Assets under construction and advance payments	Other intangible assets	Total
Net opening balance	9,901	234	3,877	194,781	218,945	218	6,660	434,616

Net closing balance	8,296	140	3,589	188,616	226,516	925	7,380	435,462

The change in the balance of intangible assets is the combined effect of 16,968 EUR/000 in additions and 16,561 EUR/000 in amortization.

The most significant addition (14,179 EUR/000) concerns consolidation differences, which increased due to the acquisition of the business of the group's former commercial distributors in New Zealand, Australia and Spain.

In 2002 the group completed the appraisals necessary for attributing the consolidation differences on companies acquired in December 2000 and during the course of 2001 to specific asset and liability items. This raised the value of the captions "Buildings" and "Concessions, licences, trademarks and similar rights", generated a reserve for deferred taxation to incorporate the tax effect of the revaluation percentage not recognized under fiscal law, and raised the value of the consolidation difference to compensate for that reserve.

EXPLANATORY NOTES TO THE
FINANCIAL STATEMENTS

The item "Concessions, licences, trademarks and similar rights" includes the value allocated as above to the group's main trademarks and the registered trademarks belonging to companies in the group.

The revaluations made in the financial statements of the Parent Company and some of the Italian subsidiaries on intangible fixed assets existing as of June 30, 2003 amount to 119,353 EUR/000.

II – TANGIBLE ASSETS

In detail:

	30.06.03		31.12.02		Change

Total	580,875	217,217	568,997	220,975	(3,758)

Movements in the main tangible assets during the first half of 2003 were as follows:

	Land and buildings	Plant and machinery	Industrial and commercial equipment	Other tangible assets	Assets under construction and advances to suppliers	Total
Net opening balance	122,531	53,307	29,734	9,878	5,525	220,975

Net closing balance	124,190	49,222	31,615	9,970	2,220	217,217

Increases pertain mostly to equipment, for the purchase of moulds used to produce new products at the plants in Treviso and Quing-Xi-Town (China). The increase in plant and other tangible assets includes the amount spent to expand the finished product warehouse in Mignagola (TV).

This item includes leased assets, as detailed below (net of accumulated depreciation):

	30.06.03	31.12.02	Change
Buildings	6,049	6,305	(256)
Plant and equipment	5,346	6,432	(1,086)

The revaluations made in the financial statements of the Parent Company and some of the Italian subsidiaries on tangible assets existing as of June 30, 2003 amount to 125,662 EUR/000.

EXPLANATORY NOTES TO THE
FINANCIAL STATEMENTS

III - FINANCIAL ASSETS

These can be broken down as follows:

	30.06.03	31.12.02	Change
Equity investments	7,196	6,657	539
Accounts receivable	1,243	6,324	(5,081)
Total	8,439	12,981	(4,542)

1- Equity investments

	30.06.03	31.12.02	Change
Subsidiary companies	2,138	1,245	893
Associated companies	4,130	4,486	(356)
Other companies	928	926	2
Total	7,196	6,657	539

Details of companies valued under the net equity method are as follows:

	Carrying value
Subsidiary companies:	
Clim.Re S.A.	2,138
Associated companies:	
Omas S.r.l.	937
Effegici S.r.l.	76
Interest held through trust company	3,117
Total associated companies	4,130

The increase (decrease) in equity investments in subsidiaries and associated companies is explained by the use of the net equity method, whose most significant effect was to raise the value of Clim.Re S.A. and to lower the value of Omas S.r.l. The loss of value for Omas S.r.l. relates to the seasonal pattern of business at companies that produce and sell heating products, which incur significant production costs during the first half of the year and earn revenues during the second six months. For that reason, the writedown should be reversed during the second half of the year.

The subsidiary Clim.Re S.A., which does limited business in the insurance sector, was consolidated under the net equity method rather than on a line-by-line basis since its inclusion would be irrelevant to the fair and truthful disclosure of the group's financial situation.

The interest held through a trust company refers to a company that makes finished products on the group's behalf. As permitted by law (Art. 39 of Legislative Decree. 127/91), we have omitted the company's name to protect its interests and those of the group.

During the first half of 2003 the group disposed of its investment in the associated company Parex Industries Ltd., which distributed De'Longhi Group products in New Zealand and Australia. Distribution is now handled by two new wholly-owned subsidiaries, De'Longhi Australia Pty Ltd. and De'Longhi New Zealand Ltd., which are consolidated on a line-by-line basis.

2- Accounts Receivable

As follows:

EXPLANATORY NOTES TO THE
FINANCIAL STATEMENTS

	30.06.03	31.12.02	Change
Due from associated companies			
- within 12 months	0	1.450	(1.450)
- beyond 12 months	0	3.510	(3.510)
Due from third parties			
- within 12 months	971	902	69
- beyond 12 months	272	462	(190)
Total	1.243	6.324	(5.081)

The amount due from associated companies as of December 31, 2002, namely from Parex Industries Ltd., was no longer outstanding at the end of June 2003.

Receivables due from third parties include security deposits and the advance staff leaving indemnities provided for in the Financial Statements of the Parent Company and its Italian subsidiaries.

C) CURRENT ASSETS**I – INVENTORIES**

This item, shown net of the inventory writedown provision, can be broken down as follows:

	30.06.03	31.12.02	Change
Raw materials, other materials and consumables	47.324	63.426	(16.102)
Work in progress and semi-finished products	23.328	18.891	4.437
Finished products and goods for resale	241.814	151.433	90.381
Total	312.466	233.750	78.716

The rise in inventories is due mainly to stocks of finished products, which increased in comparison with December 31, 2002 due to the seasonal nature of sales (in June there are higher inventories of heating products and their components that are sold in subsequent months).

The value of inventories is adjusted by an inventory writedown for obsolete and slow-moving goods totalling 12,395 EUR/000 (9,710 EUR/000 in 2002), in relation to products and raw materials no longer deemed to be of strategic interest.

The valuation of inventories on a current cost basis would produce no significant differences.

II – ACCOUNTS RECEIVABLE

Accounts receivable are made up as follows:

	30.06.03	31.12.02	Change
Trade receivables	314.274	313.701	573
Due from associated companies	825	15.451	(14.626)
Due from parent companies	1.469	-	1.469
Due from third parties	52.246	51.519	727
Total	368.814	380.671	(11.857)

Of the total, 555 EUR/000 in trade receivables and 36,605 EUR/000 in receivables due from third parties (mostly deferred tax assets) are due beyond 12 months.

EXPLANATORY NOTES TO THE
FINANCIAL STATEMENTS**1- Trade receivables**

Trade receivables amount to 314,274 EUR/000 and are shown net of the provision for doubtful debts (9,151 EUR/000).

Up by 573 EUR/000 with respect to December 31, 2002, trade receivables were affected by the revolving assets securitization of monthly receivables. On an adjusted basis, the breakdown of trade receivables would be as follows:

	30.06.03	31.12.02	Change
Trade receivables	314,274	313,701	573
Securitization effect	81,415	101,171	(19,756)
Total	395,689	414,872	(19,183)

Pursuant to CONSOB Circular no. 3369 of April 9, 1997, we report that in the context of the securitization conducted by the Parent Company and one of its subsidiaries, the transferred receivables that will be collected at their natural expiration date (outstanding) amount to 81,415 EUR/000, net of "contractual dilution". The total amount of receivables securitized from January to end-June 2003 (turnover) is 138,298 EUR/000.

The provision for doubtful debts represents a reasonable estimate of risk as of the reporting date. Provisions are made for the sake of prudence against disputed receivables or those whose collection is otherwise in doubt, taking account of the fact that a significant portion of the receivables is covered by major insurers.

The Parent Company and some subsidiaries have received customer guarantees (mainly sureties) totalling 2,212 EUR/000, to cover commercial transactions.

3- Due from associated companies

The balance relates chiefly to commercial receivables due from Omas S.r.l. (802 EUR/000) and from the investment held through a trust company (22 EUR/000). The steep reduction with respect to December 31, 2002 was caused by the elimination of the amount due from Parex Industries Ltd. (see the "Equity investments" section of these explanatory notes).

4- Due from Parent Companies

This sum refers to an indemnity due under contract.

5- Due from third parties

As follows:

	30.06.03	31.12.02	Change
Due from tax authorities	8,462	7,887	575
Prepaid taxes	34,203	34,243	(40)
Other receivables	9,581	9,389	192
Total	52,246	51,519	727

Receivables "due from tax authorities" consist of amounts due for direct taxes (392 EUR/000), indirect taxes (5,633 EUR/000) and sundry amounts paid (2,437 EUR/000).

EXPLANATORY NOTES TO THE
FINANCIAL STATEMENTS

Prepaid taxes are calculated on timing differences arising between the book values of assets and liabilities and their corresponding values for fiscal purposes, and on fiscally recognized losses. The slight change with respect to December 31, 2002 was caused essentially by translation differences on the prepaid taxes booked by foreign companies.

III – SHORT-TERM FINANCIAL ASSETS

This item includes bonds and equities acquired as investments of excess liquidity, and short-term securities (junior promissory notes) issued by Marka Finance S.A., which has issued senior promissory notes in the context of the securitization programme. These securities have monthly maturities, are renewed each month for the duration of the programme, and accrue interest at a rate linked to the EURIBOR (2.9% for the lot of June 2003).

Also included are sums collected and attributed temporarily to the company managing the securitization but that pertain to the Parent Company.

IV – LIQUID FUNDS

This item consists of excess balances in correspondence accounts at banks, arising mainly from customer payments received at period end.

D) ACCRUED INCOME AND PREPAID EXPENSES

These can be broken down as follows:

	30.06.03	31.12.02	Change
<u>Accrued income:</u>			
Interest income	337	8,648	(8,311)
Other	3	34	(31)
<i>Total</i>	<i>340</i>	<i>8,682</i>	<i>(8,342)</i>
<u>Prepaid expenses:</u>			
Insurance costs	1,639	280	1,359
Other	4,580	4,652	(72)
<i>Total</i>	<i>6,219</i>	<i>4,932</i>	<i>1,287</i>
Total accrued income and prepayments	6,559	13,614	(7,055)

The decrease of 7,055 EUR/000 is the combined effect of a reduction in accrued financial income and an increase in prepaid insurance costs, due to the different timing attribution of certain items. The reduction in accrued income, which consisted mainly of exchange rate and interest rate hedging transactions as of December 31, 2002, relates to the elimination of the EUR 150 million debenture loan issued by the subsidiary De'Longhi Pinguino SA that was reimbursed at maturity in April 2003.

COMMENTS ON THE PRINCIPAL LIABILITY ITEMS**A) SHAREHOLDERS' EQUITY**

The shareholders' meeting of April 14, 2003 approved a dividend payment totalling 8,970 EUR/000.

EXPLANATORY NOTES TO THE
FINANCIAL STATEMENTS

Movements in shareholders' equity items are shown in an attachment; below are comments on the main components and their changes.

I- SHARE CAPITAL

The share capital is made up of 149,500,000 ordinary shares of par value EUR 3.00 each, for a total of 448,500 EUR/000.

IV- LEGAL RESERVE

As of December 31, 2002 this reserve had a balance of 3,561 EUR/000. The increase of 788 EUR/000 is due to the allocation of the profit for the period, as resolved by the shareholders' meeting.

VII- OTHER RESERVES

This item is made up as follows:

	30.06.03	31.12.02	Change
Extraordinary reserve	41,493	35,488	6,005
Foreign exchange reserve	(9,380)	(5,858)	(3,522)
Total other reserves	32,113	29,630	2,483

Extraordinary reserve

The extraordinary reserve increased by 6,005 EUR/000 with respect to December 31, 2002, due to the allocation of the Parent Company's 2002 net profit as resolved by the shareholders' meeting.

Cumulative translation adjustment

This item relates to the conversion into Euro of foreign Companies' Financial Statements.

VIII - RETAINED EARNINGS (ACCUMULATED LOSSES)

These consist of retained earnings of consolidated companies and the effects of adjustments made to the accounting principles and consolidation methods.

X-XI - MINORITY INTERESTS

Minority interests amount to 757 EUR/000. The percent held by minority shareholders and their corresponding value of net equity and the profit for the period are summarized below:

Company	% Minority interest	Net equity	Operating result
E-Services S.r.l.	49%	880	553
Climaveneta Deutschland GmbH	30%	(123)	(133)
Total		757	420

Below is a brief reconciliation between the net equity and profit of the Parent Company, De'Longhi S.p.A., and the figures shown in the consolidated Financial Statements:

	Net equity	Net equity	Net income for the period	Net income for the period
	30.06.03	31.12.02	30.06.03	31.12.02

B) RESERVES FOR RISKS AND CHARGES

In detail:

	30.06.03	31.12.02	Change
Agents' leaving indemnity reserve	4,872	4,628	244
Reserve for deferred taxes	51,652	51,652	-
Product warranty reserve	5,013	4,269	744

Reserve for the coverage of investment losses	-	1,307	(1,307)
Reserve for risks	19,193	19,717	(524)
Other	1,766	1,911	(145)
Total	84,474	85,883	(1,409)

The agents' leaving indemnity reserve covers the payments that might be due to departing agents in accordance with Art. 1751 of the Italian Civil Code, as applied by collective compensation agreements in force.

The reserve for deferred taxes pertains to the fiscal effects of attributing consolidation differences to fixed asset items.

The product warranty reserve has been established, for certain consolidated companies, on the basis of a prudent estimate of under-warranty repair and replacement costs for sales taking place by June 30, 2003. It takes account of the new regulations introduced by Legislative Decree 24/2002.

The reserve for returns cover the cost of returned merchandise that was sold by June 30.

The reserve for the coverage of investment losses as of December 31, 2002, which pertained to the writedown of the interest in Parex Industries Ltd., was released during the half-year due to the disposal of that investment.

The reserve for risks includes the following:

- a provision deriving from the consolidation of Kenwood which, at the time of purchase, required an adjustment to the value of net equity to take account of some potential liabilities amounting to 11,593 EUR/000;
- the insurance excess reserve (1,909 EUR/000), which covers the group's deductible in case of liabilities arising out of complaints;

EXPLANATORY NOTES TO THE
FINANCIAL STATEMENTS

- a prudent provision of 2,000 EUR/000 against potential contractual risks, and other provisions of 3,691 EUR/000 against potential liabilities at the Parent Company and certain subsidiaries.

As for pending legal disputes with third parties, on the basis of expert opinion and the positive outcome of a previous case, we believe that there is no reasonable risk of material damage to the Parent Company's financial position.

The other reserves consist chiefly of pension fund and severance payments provided for by certain foreign subsidiaries.

C) RESERVE FOR STAFF LEAVING INDEMNITIES

Movements during the half-year are shown below by category:

	Managers	White collar	Workers	Total
Opening balance 01.01.03	2,141	8,281	12,445	22,867
Provision	355	1,038	1,547	2,940

Reclassifications	-	93	(93)	-
Net closing balance 30.06.03	2,035	8,606	12,787	23,428

D) ACCOUNTS PAYABLE

1-Bonds

In April 2003, the EUR 150 million debenture loan issued by the subsidiary De'Longhi Pinguino S.A. in April 2000 reached maturity and was fully redeemed.

2- Due to banks

As follows:

	Within one year	One to five years	Beyond five years	Balance 30.06.03	Balance 31.12.02
Current accounts	5,416			5,416	1,485
Short-term loans in EUR or foreign currency	74,328			74,328	75,021
Loans on advances	371			371	406
Current portion of long-term loans	44,251			44,251	58,235
Total short-term amounts due to banks	124,366			124,366	135,147
Long-term loans		258,337	901	259,238	128,888
Total amount due to banks	124,366	258,337	901	383,604	264,035

Of the payables due to banks, 104 EUR/000 is secured by mortgages on tangible assets. The decrease in collateral granted with respect to December 31, 2002 was caused by the repayment of loans during the half-year.

In April 2003, the Parent Company took out a five-year-maximum loan from a small pool of banks in the amount of 150,000 EUR/000. The loan, which has no collateral, charges interest at the EURIBOR rate plus a margin of less than one point.

In addition, shares of the company Kenwood Appliances Plc have been pledged against the credit line granted by a pool of banks to De'Longhi Pinguino S.A. for the acquisition of the Kenwood Group.

For a better understanding of changes in the group's net financial position, please see the summary table in the report on operations and the complete cash flow statement.

4- Due to other financial companies

The balance pertains mainly to leasing contracts booked under the financial method (8,118 EUR/000) and low-interest loans from the Ministry of Industry and Trade (6,694 EUR/000).

6- Trade payables

These are amounts due to third parties for the supply of goods and services.

8- Due to subsidiary companies

This item relates to a loan granted by the subsidiary Clim.Re S.A., which is not consolidated on a line-by-line basis.

EXPLANATORY NOTES TO THE
FINANCIAL STATEMENTS**9- Due to associated companies**

These are commercial payables due to Effe.Gi.Ci. S.r.l. (129 EUR/000), to Omas S.r.l. (53 EUR/000) and to the investment held through a trust company (85 EUR/000).

10- Due to parent companies

The balance consists of 233 EUR/000 due to De'Longhi Soparfi S.A., including 168 EUR/000 in interest on loans repaid in prior years, and 10 EUR/000 due to De'Longhi Holding S.A.

13- Other payables

As follows:

	30.06.03	31.12.02	Change
Due to personnel	25,851	20,636	5,215
Other	1,138	2,117	(979)
Total other payables	26,989	22,753	4,236

Payables due to personnel refer to compensation accrued but not yet paid as of the reporting date.

E) ACCRUED EXPENSES AND DEFERRED INCOME

These can be broken down as follows:

	30.06.03	31.12.02	Change
<u>Accrued expenses:</u>			
Charges for hedging transactions	1,183	4,454	(3,271)
Interest on bond	-	5,710	(5,710)
Other accrued expenses	3,383	3,237	146
Total accrued expenses	4,566	13,401	(8,835)
<u>Total deferred income:</u>	<u>1,947</u>	<u>2,066</u>	<u>(119)</u>
Total accrued expenses and deferred income	6,513	15,467	(8,954)

The decrease is explained primarily by the redemption of the bond (see section "D) PAYABLES: Bonds"), as regards interest rate hedging expenses and interest on the loan itself.

The heading "Guarantees in favour of related parties" includes those given by De'Longhi S.p.A. in favour of Immobiliare Findomestic S.r.l., which had entered into a real estate leasing agreement with Basileasing S.p.A.

"Guarantees in favour of third parties" have been issued mostly by the Parent Company and certain subsidiaries.

"Other commitments" consist of 6,163 EUR/000 in contractual obligations by the subsidiary De'Longhi America Inc. and 1,628 EUR/000 in the Parent Company's commitments regarding the construction of new buildings.

Financial instruments hedging financial risks

To reduce the risk of commercial and financial transactions caused by fluctuating exchange rates and interest rates, the group has established hedging contracts within the limits defined by normal operational needs.

Exchange rate derivatives: these are hedging transactions that ensure a given exchange rate on the various currencies for the group's incoming or outgoing payments. The include both forward transactions and structured options for the main currencies in which the group does business.

As of June 30, 2003, the nominal amounts of these transactions (net of any offsetting by opposite-sign contracts) were as follows:

Transactions between group companies and third parties:

USD sold against EUR	USD	24,018,375.00
USD bought against EUR	USD	(48,700,000.00)
GBP sold against EUR	GBP	50,805,343.60
GBP bought against EUR	GBP	(1,280,000.00)
EUR sold against GBP	EUR	12,000,000.00
JPY sold against EUR	JPY	2,617,801,047.00
CAD sold against EUR	CAD	10,000,000.00
AUD sold against EUR	AUD	6,200,000.00

GBP bought against NZD	GBP	(285,384.52)
USD bought against NZD	USD	(1,260,770.00)

There are also potential hedging arrangements on the purchase of USD 7,750,000 that may take effect depending on the specific trend of the spot exchange rate.

Interest rate derivatives: these are instruments that the group uses to pre-establish a maximum cost (in terms of the benchmark interbank rate) for part of its financial debt. They usually have durations of several years and can be linked to specific fund-raising operations on the market. As of June 30, 2003 they amounted to 44,517 EUR/000, of which 25,824 EUR/000 will expire by 2004, 15,493 EUR/000 by 2006, and 3,200 EUR/000 by 2008.

COMMENTS ON THE PRINCIPAL STATEMENTS OF INCOME ITEMS**A) VALUE OF PRODUCTION**

EXPLANATORY NOTES TO THE
FINANCIAL STATEMENTS

Intercompany and related party transactions

As recommended by CONSOB, below we provide information on transactions and outstanding accounts with parent companies, non-consolidated subsidiary companies, associated companies and related parties.

All transactions fall within the group's normal operations, except as otherwise stated in these notes, and are settled at arm's-length conditions.

Transactions with group companies and related parties are mostly of a commercial nature (purchase/sale of finished products and/or services).

(1) See the section "Financial fixed assets - Equity investments".

(2) Commercial transactions taking place within the first three months of 2003.

(3) This is a company that deals mainly in finished products: as permitted by law (Art. 39 of Legislative Decree 127/91), we have omitted the company's name to protect its interests and those of the group.

(4) This income relates to the commitment accepted by De'Longhi Soparfi S.A. on April 24, 2001, which releases De'Longhi S.p.A. from all liabilities arising from tax litigation and tax amnesty settlements exceeding a deductible of EUR 4 million for the years prior to December 31, 2000. The indemnity paid is in relation to the Parent Company's tax amnesty settlement pursuant to Legislative Decree 289 of December 27, 2002.

(5) The amounts shown for Max Information S.r.l. pertain to advertising services. This is a related party in that Mr. G. Sandri, a director of the Parent Company De'Longhi S.p.A., serves as its managing director.

Other than the above, there are no transactions with related parties except for the fees paid to the legal and tax consulting firm Biscozzi e Nobili, of which C. Garavaglia (a director at the Parent Company) and G. Malerba (a statutory auditor at the Parent Company) are partners. During the

first half of 2003, Biscozzi e Nobili provided consulting services to De'Longhi S.p.A. for total fees of EUR/000 125.

**AUDITORS REPORT ON THE LIMITED REVIEW OF DE' LONGHI SPA
INTERIM FINANCIAL REPORTING FOR THE SIX MONTH PERIOD ENDED
30 JUNE 2003**

To the Shareholders of
De' Longhi SpA

1. We have performed a limited review of the consolidated interim financial reporting of De' Longhi SpA for the six month period ended 30 June 2003, consisting of consolidated balance sheet, income statement and accompanying notes. We have also ensured that the management discussion and analysis is consistent with other information included in the consolidated interim financial reporting.
2. Our work was carried out in accordance with the procedures for a limited review recommended by the National Commission for Companies and the Stock Exchange (CONSOB) with deliberation n° 10867 of 31 July 1997. The limited review consisted principally of inquiries of company personnel about the information reported in the consolidated interim financial reporting and about the consistency of the accounting principles utilised therein with those applied at year end as well as the application of analytical review procedures on the data contained in the consolidated interim financial reporting. The limited review excluded certain auditing procedures such as compliance testing and verification or validation tests of the assets and liabilities and was therefore substantially less in scope than an audit performed in accordance with generally accepted auditing standards. Accordingly, unlike an audit on the annual statutory and consolidated financial statements, we do not express a professional audit opinion on the consolidated interim financial reporting.
3. Regarding the comparative data for the year ended 31 December 2002 of the consolidated financial statements and the consolidated interim financial reporting for the six month period ended 30 June 2002, reference should be made to our reports dated 25 March 2003 and 16 September 2002 respectively.
4. Based on our review no significant changes or adjustments came to our attention that should be made to the consolidated interim financial reporting identified in paragraph 1 of this report, in order to make them consistent with the criteria for the preparation of interim financial reporting established by article 81 "half yearly report" of the CONSOB Regulation approved by Resolution n° 11971 of 14 May

1999 and subsequent modifications.

- 5 As indicated in the accompanying notes to the consolidated interim financial reporting, De' Longhi SpA has adopted the faculty allowed by the above cited CONSOB Regulation and accordingly has presented the consolidated result for the period gross of taxes and provisions deriving from the application of tax laws.

DE' LONGHI S.p.A.: First Half Results as of 30 June 2003 approved by the Board of Directors:

- Net Sales were €570.7 m (+2.1% vs 30 June 2002, +6.7% at constant exchange rates)
- Gross margin up to 53.0% from 51.7% in 1H 2002
- EBITDA was €62.6 m (-0.5% vs 30 June 2002) and EBITDA margin was 11.0%
- Profit before tax and extraordinary items was €15.9 m (+ 23.6%)

Still positive signs for De' Longhi Group from main markets globally. Italy continued to grow, also thanks to new products (Alicia De' Longhi, Saladino Ariete and Mangiaebevi Simac) and favourable summer season for portable air conditioners.

The Board of Directors today has approved First Half Results of De' Longhi S.p.A. - leader in Heating, Air Conditioning and Treatment, Cooking and Food Preparation and Cleaning and Ironing segments with brands such as De'Longhi, Kenwood, Ariete and Simac.

Net Sales were €570.7 m, +2.1% compared to 30 June 2002 (+6.7% at constant exchange rates).

Second quarter reported a strong growth, with sales up by 10.6% compared to second quarter 2002 (+5.8% at current exchange rates).

First half results can be considered satisfactory, above all considering growth at constant exchange rates.

Gross margin improved from 51.7% of first half 2002 to 53.0% of first half 2003, driven by a higher utilisation of Chinese industrial platform and a more favourable sales mix (air conditioning and coffee machines). The timely reallocation of production to China, which is in its initial stage, made exchange rates effects neutral at gross margin level.

The slight reduction of EBITDA to 11.0% on sales from 11.3% of first half 2002 is ascribable to higher advertising expenses (up more than 20%), to support launch of new products, also to the benefit of the following quarters.

Profit before taxes and extraordinary items increased (€15.9 m vs €12.8 m), thanks to lower interest expenses, also by virtue of gains from currencies hedging.

Adherence to tax amnesty program for about €7.5 m was entirely accounted for in the second quarter of 2003.

As far business segments are concerned, the best performing categories were portable conditioning, dehumidification and coffee machines, also by virtue of the success of some recently launched products (compact dehumidifier and *Alicia*).

At geographical level, Italy was the best performing market (+15% in the first half). Rest of Europe (+8.6%) reported positive results thanks to higher penetration in Spain and Portugal, following set up of new subsidiaries.

"As it often happened over the recent years" – commented the Group's CEO Stefano Beraldo – "our tendency to grow primarily came from our ability to launch new products which attract the consumer's attention thanks to their innovation and quality, and only to a smaller extent from market trends overall".

"De' Longhi continued to grow and show vitality signs in main product categories and markets" – said the Group's Chairman Giuseppe De'Longhi –.

COMUNICATO STAMPA

DE' LONGHI S.p.A.: approvati dal Consiglio d'Amministrazione i risultati semestrali al 30 giugno 2003:

- Ricavi netti consolidati pari a €570,7 milioni (+2,1% rispetto al 30 giugno 2002, +6,7% a parità di tassi di cambio)
- Margine Lordo Industriale in aumento al 53% dal 51,7% del primo semestre 2002
- Utile prima delle imposte e componenti straordinari a €15,9 milioni (+23,6%)

Ancora positivi i segnali per De'Longhi dai principali mercati mondiali. In particolare, forte la crescita nel mercato italiano (+15%), in virtù dei nuovi prodotti (Alicia De'Longhi, Saladino Ariete e Mangiaebevi Simac) e della favorevole stagione estiva della quale hanno beneficiato le vendite dei condizionatori portatili.

Sono stati approvati oggi dal Consiglio di Amministrazione i risultati semestrali di De' Longhi S.p.A. - leader nei settori del riscaldamento, del condizionamento e trattamento dell'aria, della preparazione e cottura dei cibi e della pulizia della casa e stiro con marchi quali De' Longhi, Kenwood, Ariete e Simac.

I ricavi netti consolidati ammontano a €570,7 milioni, +2,1% rispetto al 30 giugno 2002 (+6,7% a parità di tassi di cambio).

In forte crescita il secondo trimestre, con un aumento del 10,6% rispetto al secondo trimestre 2002 (+5,8% a di tassi di cambio correnti).

I risultati del semestre possono essere considerati ampiamente soddisfacenti, soprattutto considerando la crescita a tassi di cambio costanti.

In miglioramento il margine lordo industriale, dal 51,7% del primo semestre 2002 al 53,0% del primo semestre 2003, grazie a un maggiore utilizzo della piattaforma industriale cinese e a un mix di prodotto più favorevole (condizionamento portatile e macchine da caffè). La tempestiva politica di delocalizzazione in Cina, comunque in fase iniziale, ha permesso di rendere sostanzialmente neutrale l'effetto dei cambi sul margine industriale.

La lieve contrazione dell'EBITDA all'11,0% sul fatturato rispetto all'11,3% del primo semestre 2002 è imputabile all'incremento della spesa pubblicitaria (in aumento di oltre il 20%), a supporto del lancio dei nuovi prodotti, anche a beneficio dei trimestri futuri.

Prima delle imposte e dei componenti straordinari, l'utile risulta in aumento (€15,9 milioni rispetto a €12,8 milioni), grazie a una riduzione degli oneri finanziari determinata anche dai

proventi sulle coperture cambi. L'adesione al concordato fiscale, per circa €7,5 milioni, incide interamente sul secondo trimestre del 2003.

A livello di area di business, i maggiori contributi alla crescita sono stati forniti dal condizionamento mobile, dalla deumidificazione, dalle macchine da caffè, anche in virtù del successo dei prodotti recentemente lanciati (deumidificatore compatto e *Alicia*).

A livello geografico, la crescita più rilevante è avvenuta in Italia (+15% nel semestre). Molto positiva la crescita nel resto d'Europa (+8,6%) grazie anche all'incremento della penetrazione in Spagna e Portogallo, in virtù della gestione diretta delle nuove strutture commerciali.

"Come spesso è successo negli ultimi anni" – ha affermato l'Amministratore Delegato Stefano Beraldo – "la capacità del nostro Gruppo di crescere non dipende tanto dall'andamento dei mercati in cui opera quanto dall'abilità di introdurre prodotti che per innovazione e qualità s'impongono all'attenzione del consumatore."

"Il Gruppo continua a crescere e a dare segnali di vitalità nelle principali famiglie di prodotto e nei mercati di riferimento:" – ha aggiunto il Presidente Giuseppe De'Longhi.
